PROFESSIONAL SUMMARY

As a seasoned MERN stack developer, I possess advanced expertise in MongoDB, Express.js, React, and Node.js. My specialization lies in crafting dynamic web applications that are not only responsive but also user-friendly. My extensive knowledge and experience enable me to contribute significantly to any development project. I am deeply passionate about creating scalable and efficient web solutions that are tailored to the unique needs of my clients. Whether I'm building a new application from scratch or enhancing an existing system, my dedication to delivering high-quality results that exceed expectations is evident. My primary focus is always on creating innovative and practical solutions.

EXPERIENCE

● November 2023 - December 2023

Salesforce Developer Intern

Salesforce

- Integrated 3rd party applications into sales force by writing apex classes and invoking restful web services.

- Resolved integration issues between Salesforce and other third-party applications.

- Developed integrations between Salesforce and external services using REST APIs.

- Created lightning web components to replace Aura components as part of the transition process.

- Debugged existing codebase written in Apex, VisualForce and JavaScript.

- Utilized VisualForce pages and components to create a customized user experience.

- Created triggers, workflows, process builder flows, approval processes and validations rules.

- Modified existing software to correct errors, adapt to new hardware or upgrade interfaces.

● December 2022 - January 2023

Web Developer Intern

Oasis InfoByte

- Developed and maintained web applications using HTML, CSS, JavaScript, and React.

- Built responsive websites utilizing best practices in UI and UX design principles.

- Designed webpages in accordance with company's products and services.

- Wrote supporting code for web applications and websites.

- Developed databases that supported Web applications and Web sites.

September 2023 - November 2023

Full Stack Web Developer Intern

Hukkum It Solution

- Contributed ideas towards improving development processes through team discussions and brainstorming sessions.

- Evaluated open source libraries against project needs before integrating them into applications..

- Built reusable UI components that can be used across multiple projects.

- Utilized React Router to implement navigation within the application.

- Integrated external APIs into the application to fh data from remote servers.

- Collaborated with front-end developers to ensure a smooth integration of the back-end code into the user interface.

EDUCATION

2020 - Now

Bachelor of Technology - BTech

Institute of Techonology and Managment Gwalior / India, Gwalior

- Comprehensive understanding of programming languages, data structures, algorithms, and more
